

## **Dumonde Tech™**

**Original** and **Lite** formula Bicycle Chain Lube (BCL)

### **What Makes Dumonde Tech™ BCL Superior?**

- Liquid plastic forms long-lasting coat on all chain surfaces
- “Riding in” forms an extremely low-friction plating
- Plating bonds to chain; can't be washed off
- Components stay cleaner, last longer, run quieter
- Extremely durable, outlasts all other chain lubes
- Environmentally sensitive and saves money

### **What's the Difference Between Lite and Original BCL?**

*Lite* and *Original* BCL differ only in their concentration. *Lite* BCL is less concentrated for easier application and optimum performance. *Original* BCL is more concentrated for exceptional durability under the most challenging conditions. The two formulas are compatible and may be used interchangeably. We recommend the *Lite* BCL for road riding and the *Original* BCL for mountain biking.

### **Preparation and Application:**

To get the most out of *Dumonde Tech™* BCL clean and dry your chain thoroughly before the first application. We recommend *Dumonde Tech™* Bio Green Citrus Solvent for this preparation. You will only need to do this once, prior to the first application. Apply sparingly and wipe off excess lube so that the outer surface appears dry. One ounce of *Dumonde Tech™* BCL should last for at least 10 applications.

### **Cleaning and Reapplication:**

Reapply *Dumonde Tech™* BCL when you begin to hear your chain; sound, not appearance, is the best indicator to reapply. Use soap and water to clean before a reapplication; strong solvents or cleaners between applications will remove the protective plastic plating. Allow three to five applications of *Dumonde Tech™* BCL to achieve optimum plastic plating.

### **About Dumonde Tech™:**

Winners know *Dumonde Tech™*. The Kirkland, Washington based company has earned a respected name in professional motorsports for its high quality lubricants. The *Dumonde Design Group* brings the same technology and innovation to the bicycle industry. Using proven research methods and proprietary technology, *Dumonde Tech™* products outperform the competition and save you money! Check out their websites at [www.dumondetech.com](http://www.dumondetech.com) and [www.racingfl.com](http://www.racingfl.com).

## Who's Talking About **Dumonde Tech™ Original** and **Lite BCL?**

**Gary Wolf, Professional mechanic for Team Maxxis:** "I've used Dumonde Tech since 2001 and rely on it solely for our chains. It's the best lube out there. Simple, just use It!"

**Shane Fedon, Chief Engineer Rock Racing Pro Cycling Team and Rock Racing Bicycles:** "I've been using Dumonde Tech lubricants since 2000, with some of the best athletes and pro teams in the industry! It's 2009 and Dumonde Tech is the only lube I'll let our team mechanics use!"

**David Turner, Turner Suspension Bicycles:** "All of us here at Turner bikes are huge fans of the Dumonde Tech. In fact I just took a chain and cog-set off a bike that showed no wear after about 6 months as my primary mountain bike. Dumonde Tech Bicycle Chain Lube is all anyone at Turner uses and it is all we recommend. Your stuff rocks!"

**Alan Lenhoff, Bicycle Enthusiast:** I started using Dumonde Tech two years ago, and my bike's drive train has never been cleaner or quieter. It's really hard to believe that a bike chain, which doesn't operate at really high speeds or temperatures, would benefit from using anything beyond ordinary oil. The claims really sounded like hype. But my bike shop mechanic suggested Dumonde Tech, and it makes a difference!

**Keith Novello, Red Rocks Cyclery, Morrison, CO:** "I can honestly say that your lube absolutely blows everything else out of the water. I am the owner of Red Rocks Cyclery in Morrison CO and have been racing and wrenching on bicycles for fifteen years. I've tried every lube to ever come on the market, and yours is the only one that actually works. Thanks for producing such a great product!"

**Paul Smith, President, Rainbow Racing, Monument, CO:** "This summer I took a two-week mountain bike trip, starting in Canada and riding every day as we traveled back to Colorado. We rode in everything from muddy, wet conditions in Canmore to dry and dusty in Steamboat and never once had to re-lube my chain. The bikes were out in the elements every night - cold, rain, bugs, etc. and the Dumonde Tech lube worked great every day. Thanks again for such a great product!"

**Brett Wolfe, Unique Endurance Racer:** "Durability, period. When set up correctly nothing else even comes close to Dumonde Tech's toughness and versatility".

**Tom Gordon, Columbus OH:** "I've worked on a lot of bikes over the years. It's been more than a little bit of a challenge to find a lube that both works well and doesn't create a ridiculous mess. Enter Kevin Skeen and Dumonde Tech. After dealing with Kevin for the last year I've put your chain lube on all of our bikes. I had to email you because quite frankly I am amazed! Dumonde Tech is infinitely better in its bonding qualities and at keeping the drivetrain both clean and dry. Great job I couldn't praise this product enough, and I will be recommending it to all the people I know in the Multisport and road racing communities. I know one thing for sure if all the IBD's knew how good your stuff is they wouldn't be able to keep it in stock, it's that good. Thanks for providing the market with a much-needed product."

## For added benefit, use the complete **Dumonde Tech™** line of products:

### **Dumonde Tech™ Bio Green Citrus Solvent:**

100% high-grade citrus solvent. Absolutely the strongest natural degreaser on the market.

### **Dumonde Tech™ Liquid Grease:**

The high performance replacement for regular grease. Reduced friction through Polymer Technology.

### **Dumonde Tech™ MR Grease:**

Micro Resistance Polymer technology provides the ultimate protection for bearings and pivots.

### **HG Needle Applicator:**

Designed to allow greater control when applying **Dumonde Tech™** lubricants.

## Dumonde Tech™

### G-10 formula Bicycle Chain Lube (BCL)

#### What makes Dumonde Tech™ Bio Green G-10 the best?

- Earth Friendly, 100% Bio Degradable and 100% Plant Based
- Bonds to chain; isn't washed off by water
- Components stay cleaner, last longer, run quieter
- Extremely durable, outlasts all other bio base chain lubes
- Environmentally sensitive helps to save the planet

**Winners Know!** *Dumonde Tech™* has earned a respected name in the bicycle industry for high quality, eco-friendly products. All *Dumonde Bio-Green Lubricants* are developed from plant, vegetable or seed oil, rated as bio-based and Earth-friendly. For more than 20 years, *Dumonde Tech™* has demonstrated a commitment to eco-friendly products, at the same time engineering the world's best-performing and best-protecting lubricants. With proven research methods backed up with our proprietary technology, *Dumonde Tech™* products outperform the competition *and* save the environment!

**Prepare for** maximum performance from *Dumonde Tech™* G-10. Clean and dry the chain thoroughly before the first application. We recommend *Dumonde Tech™ Bio Green Citrus Solvent* for this preparation. You will only need to do this once, prior to the first application.

**Apply sparingly** and wipe off excess lubricant so that the chain's outer surface appears dry. One ounce of *Dumonde Tech™* G-10 should last for at least 10 applications.

**Reapply *Dumonde Tech™* G-10** only when you begin to hear your chain; sound, not appearance, is the best indicator of when the chain needs a reapplication of G-10. Use mild soap and water to clean between applications.

#### Who's Talking About *Dumonde Tech™* G-10 Bicycle Chain Lube?

**Matt Phillips, [www.bicycling.com](http://www.bicycling.com):** *"Dumonde's Bio-Green lube surprised me because it doesn't act "green" - it actually works. Other "green,"... lubes I've sampled were either very short-lived or incredibly messy... I've found a "green" lube that I like... Bio-Green so far seems to perform very much like regular Dumonde... It provides 80 to 90 percent of the (very, very high) performance of regular Dumonde. It's good enough that I've finally found a "green" lube I can switch to with little perceptible performance tradeoff."*

**Scot Banks, Mechanic, Absolute Bikes, Salida, Colorado:** *"I tested Dumonde Bio Green G-10 off road, in hard pack conditions with a fine layer of dust on top, throw in a bunch of puddles, snow banks and streams to cross and you get the picture. I was very impressed in the ability of Dumonde G-10 to stand up to this type of environment with minimal need for reapplication. No chain suck, No greasy mess, and No noise. Dumonde Tech G-10 has been a pleasure, another great product from Dumonde Tech!"*

**Shannon Mominee, [www.dirtraggmag.com](http://www.dirtraggmag.com):** *When I sat down to write this, I'd forgotten that I've been using a "green" lube on my chain. Mostly because I haven't had to re-apply it every other day like other bio-lubes I've tried... My drivetrain runs quiet and the lube lasts without creating a wet, black mess all over the chain. With G-10 a little does go a long way..."*

***Protecting the Earth with every revolution***
